

# Mechanical Locks

We offer a wide range of mechanical locks from leading suppliers and supply other locks as well if needed. Please contact our Sales team and tell them what kind of needs you have so that we can find a suitable lock to fit your needs.

## PRODUCT RANGE

### Cylinder locks

**ABLOY CLASSIC.** ABLOY Classic is a well-known and affordable locking solution. It is delivered with PUNTA keying (serialization), but is also available keyed to the customer's keying on order. Master key on order.

**ABLOY SENTRY.** ABLOY SENTRY is an ideal patent-protected key system for furniture locking needs. Full metal keys and the patented AWS (Anti-Wear-System) operating mechanism ensure the system's persistent accurate feel. The ABLOY SENTRY system patent is valid until 2026 and design protection until 2035. The lock is keyed customer-specifically.

**ABLOY SENTO.** Owing to the patented AWS (Anti-Wear-System) operating mechanism, the feel when using the key remains sharp and locks open effortlessly from year to year and decade to decade. The ABLOY SENTO system patent is valid until 2026. The design protection is valid until 2034. The locks are keyed customer-specifically.

**PUNTA LOCK, EURO-LOCKS.** A PUNTA lock is an affordable and reliable locking solution. Always delivered with PUNTA keying. Master key available on order.

PRODUCT RANGE

## Padlock latches

A padlock latch is a reliable and the most affordable solution for locking. It is a good choice for locations where users change frequently. Compatible with padlock shackle diameters from 6 to 8 mm. Compatible padlocks are also available from us.

**WANG TONG 0903.** A reliable basic padlock latch with a sturdy attachment to the door. Good burglary protection.

PRODUCT RANGE

## Padlocks

**PUNTA PADLOCK.** The padlock is compatible with PUNTA padlock latch. The 4-digit code of the lock can be easily changed by the user.

PRODUCT RANGE

## Numeric code locks

**SINOX AL2003.** The lock is operated with a 4-digit code that can be changed by the user. A special feature of the lock is the possibility to choose either public or private operation. The public operation is suitable for locations where users do not have personal lockers. The user chooses a code using the dials, uses the locking knob to lock the lock and resets the number dials. After unlocking, the next user can set their own code. In case of private operation, the code remains the same until the user changes it.

A mechanical master key is available for the lock, which allows finding out the lock code to open the lock. The full metal structure of the lock ensures durability even at demanding locations.

## PRODUCT RANGE

### Coin locks

**OJMAR.** All Ojmar locks are available in dry room and wet room versions. The corrosion resistant materials used in wet room locks ensure long service life of the locks even in demanding conditions.

The lock cylinder is easy to replace without replacement of the entire lock.

**COIN OPERATED LOCK.** The standard version of the lock operates with €1 coins, but the manufacturer also offers versions for all Euro coins starting from 20 cents. With optional equipment, the lock can be converted to collect.

**CARD LOCK.** Ojmar card locks are especially suitable for locations where RFID key card-based gates or door access control are used. The lock is locked using a mechanical key, but it cannot be removed before the key card has been inserted into the lock as a deposit. The lock has a special security feature to ensure that it can only be operated with a proper key card. It prevents locking using a calling card or a piece of cardboard, for example.

**KEY WRISTBAND.** Wristbands for keys are available in different colours as accessories to facilitate visiting swimming pools and spas, for example.

**ABLOY COIN OPERATED LOCK.** Abloy coin operated locks are available with a tray for returning the coin or with a coin box for collection. The locks are operated using ABLOY SENTRY keys and work with €1 coins.
